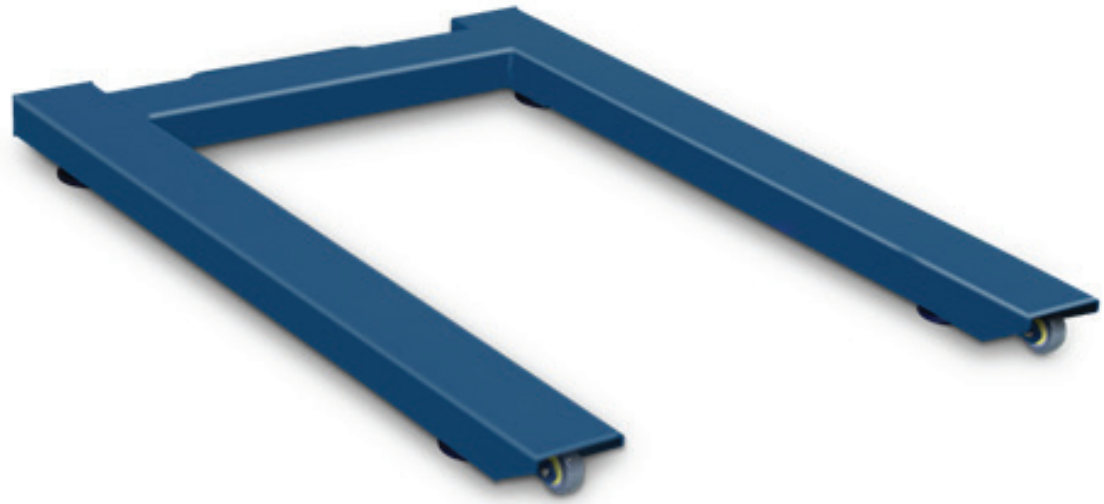
FPW SERIES PALLET-WEIGHERS



DINI ARGEO
Scales - Weighing systems

Low profile, easy to move, pallet-weighing scale.Suitable for industrial and commercial applications, in which it's necessary to quickly weigh goods on a pallet. The standard version is provided with approved load cells.

Features

- Functioning with 4 shear-beam 350Ohm nickel-plated steel load cells, approved according to OIML R60 C3 standards (3000 divisions), IP67 protection degree.
- Accuracy: +/- 0.1% of the maximum capacity in the versions for internal use.
- Accuracy: +/- 0.05% of the maximum capacity in the "M" approved versions.
- Moulded sheet-steel structure, oven-fire painted RAL 5007 blue.
- Adjustable, shock-proof jointed feet, level, 2 wheels and handles for moving it.
- 5/15 Vdc power supply.
- Shielded about 3m long cable for connection to the indicator.
- Upon request:
  - platform calibration service with weight indicator;
  - 3000e CE-M approval, to be combined always to the calibration service;
  - support column for indicator.
